

Conference Overview

To strengthen theoretical innovation, technological breakthrough and international cooperation in the field of engineering geology and environment, the XIV Congress of the International Association for Engineering Geology and the Environment (IAEG XIV Congress 2023) will be held in Century City International Convention Center, Chengdu, China, from September 21 to 27, 2023. The theme of this conference is **"Engineering Geology for a Habitable Earth"**.

With the expectation to attract more than 2,000 global participants from geology, civil engineering, water conservancy, environment, energy, transportation, marine and other related fields to attend the conference, IAEG XIV Congress 2023 is an ideal platform to expand promotion, attract talented future employees and engage with future collaborators for corporate/research institute in the field of Engineering Geology and the Environment.

Since the founding of IAEG in 1964, which is a worldwide scientific society with more than 5,200 members and 59 national groups, IAEG Congress is held every four years. The previous IAEG Congress were in Paris, France (1970); São Paulo, Brazil (1974); Madrid, Spain (1978); New Delhi, India (1982); Buenos Aires, Argentina (1986); Amsterdam, Netherlands (1990); Lisboa, Portugal (1994); Vancouver, Canada (1998); Durban, South Africa (2002); Nottingham, United Kingdom (2006); Auckland, New Zealand (2010); Torino, Italy (2014); San Francisco, USA (2018).

General Scientific Themes

The topics included but not limited to below:

- Climate Change Mitigation and Adaption
- Engineering Geology and Sustainable Development
- Mechanism, Monitoring and Early Warning, Prevention and Assessment of Geological Disasters
- Environmental Engineering Geology and Ecosystem Protection
- Geotechnical Properties of Rock and Soil Mass
- Water reservoirs, Large Dams and associated Ground Stability
- Traffic Engineering Geology and Sichuan-Tibet Railway Construction
- Energy Engineering Geology and Deep Earth Resource Exploitation
- Urban Engineering Geology and Underground Space Utilization
- Marine Engineering Geology and Coastal Development
- Polar, Planetary Engineering Geology and Disasters
- Artificial Intelligence, Big Data and Engineering Geology
- New Theory and Technology of Engineering Geology
- Preservation of Cultural Heritage and Engineering Geology
- Education and Disciplinary Development of Engineering Geology
